Well that is a good idea...I wasn't far from opening it when you sent the email.

☹ Having had my computer crashed by this stupid pdf at least 5 times over the last few days, I figured I would try to pre-empt the email back-and-forth eruption that was about to happen.

I strongly recommend that none of you open the one titled "0001-1508-04 GKM SAP-QAPP 080815" because there is a problem with the pdf (it's been there for days and we've been asking them to fix it) - it can/will cause your computer to crash. If you get the Region 9 SAP (attached here) - they took it directly from R8 and it appears to be the same thing but actually works beyond page 32. Do not know for certain that it is identical because we cannot get a working copy of the R8 document.

Looks like they have everything here except the surface water SAP/QAPP. I will endeavor to track that down.

Joyel:

I have attached the project SAP/QAPP and amendments. These files are on the Operations Viewer and John Lucotch had to give permission to access this part of the site on epaossc.org.
